

Maryland Health Security Profile

The National Health Security Preparedness Index tracks state and national progress in preparing for disasters, disease outbreaks and other emergencies that pose risks to health and well-being. The Index measures changes in national and state health security capabilities over time, across a broad array of domains and sectors. The 2017 release of the Index is based on 139 measures organized into the six domains below and 19 subdomains on the following page. The 2017 release includes annual results for four time periods: 2013, 2014, 2015, and 2016. Pages 3 to 8 display data for all measures included in the Index.

Strengths:

- Maryland's largest improvement occurred in the Community Planning & Engagement domain, which increased by 12.5% between 2013-16.
- The state's highest health security level in 2016 occurred in the domain of Incident & Information Management with a value of 9.3.
- Health security levels in 2016 significantly exceeded the national average in 5 domains: Community Planning & Engagement, Incident & Information Management, Healthcare Delivery, Countermeasure Management, and Environmental & Occupational Health.

Challenges:

- Health security levels in 2016 declined in 2 domains, with the largest decline of -10.1% occurring in Environmental & Occupational Health.
- The state's lowest health security level in 2016 occurred in Community Planning & Engagement with a value of 6.3.
- Health security levels in 2016 were significantly below the national average in none of the six domains.
