

Connecticut Health Security Profile

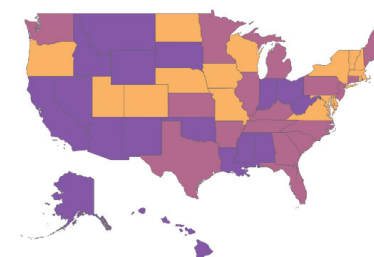

The National Health Security Preparedness Index tracks state and national progress in preparing for disasters, disease outbreaks, and other emergencies that pose risks to health and well-being. The Index measures changes in national and state health security capabilities over time, across a broad array of domains and sectors. The 2020 release of the Index is based on 130 measures organized into the six domains and 19 subdomains listed on page 3. The 2020 release includes annual results for seven years (2013-2019) and a comparison of Index values to hazards faced (page 4). Pages 5 to 13 display data for all measures included in the Index and the chart below shows health security trends from 2013-2019 overall, and across all domains.

OVERALL
Connecticut's overall health security level reached 7.1 out of 10 in 2019, a 10.9% increase from 2013.
The overall health security level in Connecticut was significantly above the national average health security level of 6.8 in 2019.
STRENGTHS
Connecticut's largest improvement occurred in the Incident & Information Management domain, which increased by 23.6% between 2013-19.
Health security levels in 2019 significantly exceeded the national average in 3 domains: Health Security Surveillance, Community Planning & Engagement, and Healthcare Delivery.
The state's highest health security level in 2019 occurred in the domain of Incident & Information Management with a value of 8.9.
CHALLENGES
Health security levels in 2019 declined in no domains.
Health security levels in 2019 were significantly below the national average in none of the six domains.
The state's lowest health security level in 2019 occurred in Healthcare Delivery with a value of 5.3.

Connecticut Health Security Hazards 2012-2018

Each state faces a unique combination of hazardous events. The table below shows the types of hazards that Connecticut experienced between 2012 and 2018 and the aggregated effects of those hazards in terms of injuries, deaths, and economic damages. During those same years, hazardous events in the United States resulted in a total of 13,839 injuries, 3,522 deaths, and \$222 billion in property damage. Our research shows that states with higher levels of preparedness as measured by the Index experienced lower incidence of deaths and injuries attributable to hazardous events, after adjusting for the intensity of hazardous events in each state. (See Figure below).

Connecticut Health Security Hazards 2012-2018

Hazard Type	Total Injuries	Total Deaths	Property Damage (\$ in 1000s)
Flooding	0	0	\$ 359.41
Hail	1	0	\$ 75.47
High Wind	9	7	\$ 14,849.61
Lightning	18	0	\$ 1,422.61
Severe Storm/Thunder Storm	3	2	\$ 4,405.32
Severe Winter Weather	1	1	\$ 258.38
Tornado	0	0	\$ 5,845.33
Total	32	10	\$ 27,216.12

Totals may not equal the sum of columns due to rounding of imputed values.

Data on hazardous event injuries, deaths and economic losses were obtained from:

Center for Emergency Management and Homeland Security (2020). *The Spatial Hazard Events and Losses Database for the United States, Version 18.0* [Online Database]. Phoenix, AZ: Arizona State University.

Available from <http://www.sheldus.org>

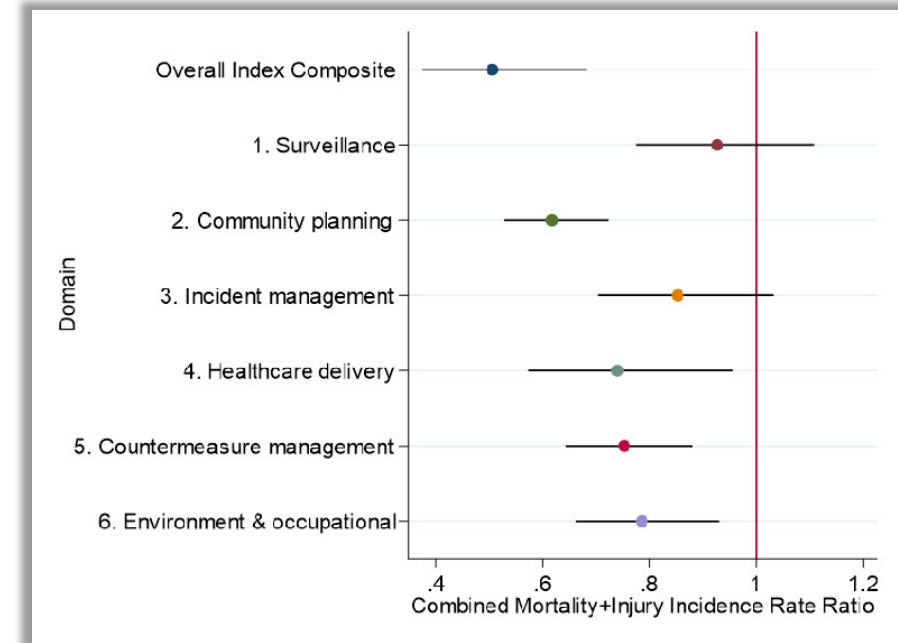

Figure: Changes in the Combined Annual Incidence of Hazardous Event Deaths and Injuries Associated with a 1 Unit Increase in Index Scores, 2013-2018.

Note: Coefficient estimates are indicated with filled circles, and 95% confidence intervals are noted with horizontal lines. Estimates were obtained from zero-inflated negative binomial models using generalized estimating equations with unstructured error correlation to account for repeated observations in each state over years 2013-18. Models were adjusted for the intensity of hazardous events using a measure of total property damage losses per state per year.

Subdomain 4.3: Long-Term Care	5.8	5.7	4.4	5.3	5.4	5.2	5.1
M308 – Average number of nurse (RN) staffing hours in nursing homes in the state—hours per resident per day (Min=0.3, Max=2.2)	0.9	0.9	0.9	0.9	0.9	0.8	0.7
M309 – Average number of nursing assistant (CNA) staffing hours in nursing homes in the state—hours per resident per day (Min=2, Max=4.7)	2.5	2.5	2.4	2.5	2.4	2.3	2.2
M307 – Percent of long-stay nursing home residents in the state given the seasonal influenza vaccine (Min=86.2, Max=98.3)	92.3%	91.0%	90.5%	94.6%	95.1%	95.1%	95.3%
M310 – Average number of licensed practical nurse (LPN) staffing hours in nursing homes in the state—hours per resident per day (Min=0.3, Max=1.2)	0.8	0.8	0.8	0.8	0.8	0.8	0.8
M303B – Number of nursing home deficiencies (evacuation plan deficiencies or emergency planning deficiencies) per 100 nursing homes in the state (1=Highest Quintile and 5=Lowest Quintile) (reverse coded) (Min=1, Max=5)	1.0	1.0	4.0	3.0	3.0	4.0	4.0
M23NH – Number of disease outbreaks in nursing homes or assisted living facilities per 10,000 certified nursing home residents in a state (reverse coded) (Min=0, Max=100.9)	6.7	3.7	2.1	4.6	3.5	1.8	5.7
M880 – Percentage of nursing home residents at facilities that did not have an infection control deficiency (Min=33.9, Max=93.1)	58.1%	58.1%	58.1%	58.1%	58.1%	69.5%	69.5%
Subdomain 4.4: Mental & Behavioral Healthcare	4.0	3.9	3.7	4.0	3.9	5.1	4.9
M316 – Percent of hospitals in the state providing psychiatric emergency services (Min=6.3, Max=71)	55.6%	53.3%	50.0%	54.5%	52.3%	53.5%	51.2%
M317 – Percent of need met for mental health care in health professional shortage areas (HPSA) in the state (Min=3.7, Max=100)	32.0%	32.0%	32.0%	34.3%	40.5%	15.0%	14.0%
M800 – Percent of the state's population not living in a HRSA Mental Health Professional Shortage Area (Min=0, Max=100)	18.2%	18.2%	18.2%	18.2%	10.1%	69.6%	68.6%
Subdomain 4.5: Home Care	4.9	5.3	5.5	5.6	6.2	6.7	6.8
M291 – Percent of home health visits in the state where the home health team determined whether their patient received a flu shot (Min=60, Max=87.3)	69.0%	70.0%	69.7%	69.2%	73.3%	76.5%	77.4%
M292 – Percent of home health visits in the state where the home health team began their patients' care in a timely manner (Min=76, Max=98.4)	93.0%	93.0%	93.7%	94.3%	95.3%	95.8%	95.7%
M293 – Number of home health and personal care aides per 1,000 population in the state aged 65 or older (Min=12.7, Max=78.9)	36.4	40.9	44.1	45.8	44.2	45.3	43.3

About the Index

The National Health Security Preparedness Index is a program of the Robert Wood Johnson Foundation. The Program Office for the Index is based at the Colorado School of Public Health and staffed through a collaboration between the Department of Health Systems, Management and Policy, Colorado School of Public Health, Anschutz Medical Campus, and the Center for Business and Economic Research, Gatton College of Business and Economics, University of Kentucky. The Program Office is directed by Glen P. Mays, Ph.D., Professor and Chair, Department of Health Systems, Management and Policy, at the Colorado School of Public Health.

National Advisory Committee Members, 2019-2020:

Members

Anita Chandra, DrPH

Director of Justice, Infrastructure, and Environment, RAND

Thomas Dobbs, MD, MPH

State Health Officer, Mississippi Department of Health

Eric Holdeman

Director, Center for Regional Disaster Resilience (CRDR) and Senior Fellow at Emergency Management Magazine

Ana-Marie Jones

Chief Resiliency Officer, Interpro

Dara Lieberman, MPP

Director of Government Relations, Trust for America's Health

Robert Mauskopf, MPA,

Director of Emergency Preparedness, Virginia Department of Health

Colonel, USMC (ret.)

Suzet McKinney, DrPH, MPH

Executive Director, Illinois Medical District Commission

F. Christy Music

Program Director, Health and Medical Policy, U.S. Department of Defense

Stephen Redd, MD

Director, Office of Public Health Preparedness & Response, U.S. Centers for Disease Control and Prevention (CDC)

Kevin Yeskey, MD

Deputy Assistant Secretary for Preparedness and Response
