

Montana Health Security Profile

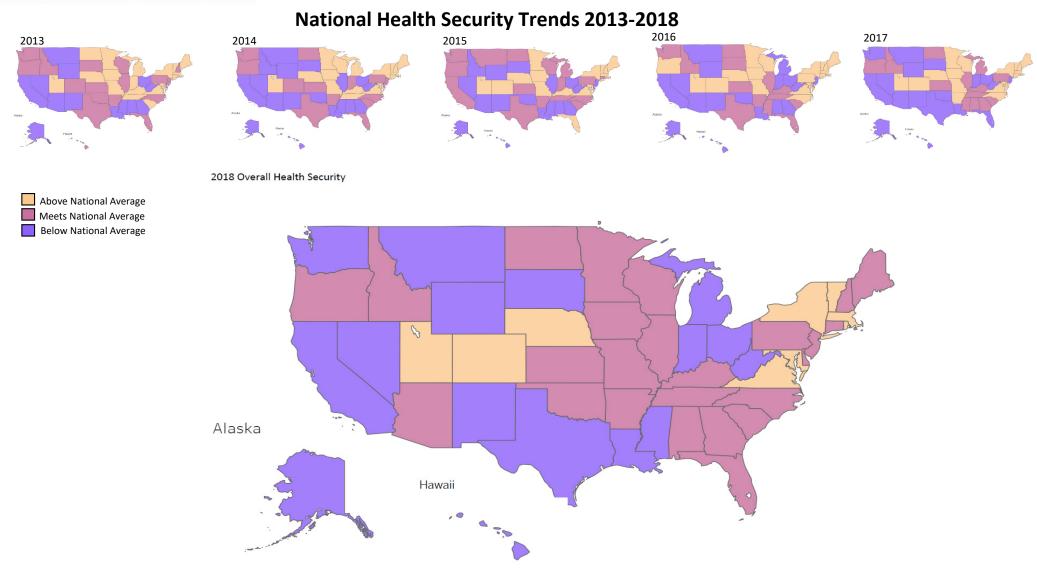

The National Health Security Preparedness Index tracks state and national progress in preparing for disasters, disease outbreaks, and other emergencies that pose risks to health and well-being. The Index measures changes in national and state health security capabilities over time, across a broad array of domains and sectors. The 2019 release of the Index is based on 129 measures organized into the six domains and 19 subdomains listed on page 3. The 2019 release includes annual results for six years (2013-2018) and a comparison of Index values to hazards faced (page 4). Pages 5 to 10 display data for all measures included in the Index and the chart below shows health security trends from 2013-2018 overall, and across all domains.

Montana Domain and Subdomain Summary

Montana's overall health security level reached 6.5 out of 10 in 2018, a 22.6% increase from 2013. The overall health security level in Montana was significantly below the national average health security level of 6.7 in 2018.

Strengths:

- Montana's largest improvement occurred in the Community Planning & Engagement domain, which increased by 131.8% between 2013-18.
- The state's highest health security level in 2018 occurred in the domain of Incident & Information Management with a value of 8.4.
- Health security levels in 2018 significantly exceeded the national average in none of the six domains.

Challenges:

- Health security levels in 2018 declined in no domains.
- The state's lowest health security level in 2018 occurred in Healthcare Delivery with a value of 4.3.
- Health security levels in 2018 were significantly below the national average in 3 domains: Incident & Information Management, Healthcare Delivery, and Environmental & Occupational Health.

Support for the National Health Security Preparedness Index is provided by the Robert Wood Johnson Foundation. The views expressed here do not necessarily reflect the views of the Foundation. Montana Health Security Hazards 2012-2017

Each state faces unique health security hazards. The table below shows health security hazards that Montana experienced between 2012 and 2017 and the aggregated effects of those hazards in terms of event length, injuries, deaths, and economic damages. During those same years, health security hazards in the United States resulted in 12,249 injuries, 2,852 deaths, and 191 billion dollars in property and crop damage. Our analysis comparing Index scores to the cost of actual hazards suggests that states with higher levels of health security incur less economic damage from the hazards they face (see chart, below).

Montana Health Security Hazards 2012-2017

Hazard Type	Duration of Events (Days)	Injuries	Deaths	Property Damage (\$ in 1000s)	Crop Damage (\$ in 1000s)
Avalanche	2	5.04	8	342	-
Flooding	5	5	0	2,871	23
Hail	1	0	0	1,849	114
High Wind	2	1.5	1	5,037	208
Landslide	1	0	0	15	-
Lightning	1	4	0	106	-
Severe Storm/Thunder Storm	3	1.5	1	4,127	53
Severe Winter Weather	3	5.99	6	1,229	57
Tornado	1	8	0	2,119	-
Wildfire	2	0	0	11	-
Total	21	31.03	15	17,706	456

Note: Numbers reflect author's analysis of data from the Spatial Hazard Events and Losses Database for calendar years 2012-2017. Data on event duration do not include response and recovery time periods that extend beyond the active event period. Hazardous events are limited to those recorded in federal registries for weather, climate, and geological events and for Presidential Disaster Declarations. Disease outbreaks, industrial and infrastructure events, and other non-natural events are included only in cases of Presidential Disaster Declaration. Monetary data are adjusted to 2017 dollars. For more information, see: "Spatial Hazard Events and Losses Database for the United States, Version 17.0." at https://cemhs.asu.edu/sheldus/

M188 – Percent of adults in the state who volunteer in their communities (Min=16.7%, Max=51.1%)	29.2%	32.8%	29.3%	32.1%	38.8%	38.8%
M189 – Number of annual volunteer hours per state resident, 15 years and older (Min=15.9, Max=89.4)	43.1	39.7	32.0	35.1	33.6	33.6
DOMAIN 3: INCIDENT & INFORMATION MANAGEMENT INDEX VALUE (0-10)	7.2	7.4	8.1	8.4	8.4	8.4
SUBDOMAIN 3.1: INCIDENT MANAGEMENT INDEX VALUE (0-10)	4.6	4.8	7.1	7.1	7.1	7.1
M84 – State all hazards emergency management program is accredited by the Emergency Management Accreditation Program (EMAP)	No	No	No	No	No	No
M107 – Percent of local health departments in the state with an emergency preparedness coordinator (Min=25.0%, Max=100.0%)	97.2%	97.2%	97.2%	97.0%	97.0%	97.0%
M701 – Average number of minutes for state health department staff with incident management lead roles to report for immediate	16.0	9.0	12.0	9.0	10.0	12.0
emergency response duty (reverse coded)(Min=2.0, Max=651.0)	10.0	9.0	12.0	9.0	10.0	12.0
M344 – State has adopted the Nurse Licensure Compact (NLC)	No	No	Yes	Yes	Yes	Yes
SUBDOMAIN 3.2: INFORMATION MANAGEMENT INDEX VALUE (0-10)	2.7	3.9	4.4	5.4	5.4	5.6
M228 – Percent of households in the state with broadband in the home (Min=56.7%, Max=89.1%)	70.3%	72.1%	72.9%	78.5%	78.9%	81.3%
M906 - Percent of hospitals in the state that have demonstrated meaningful use of certified electronic health record technology	80.0%	92.0%	95.0%	98.0%	98.0%	98.0%
(CEHRT)(Min=61.0%, Max=100.0%)	00.070	32.070	33.070	30.070	30.070	30.070
M907 - Percent of office-based medical doctors and doctors of osteopathy in the state that have demonstrated meaningful use of certified	33.0%	44.0%	51.0%	64.0%	64.0%	64.0%
electronic health record technology (CEHRT)(Min=16.0%, Max=93.0%)						
M1001 - State has implemented Enhanced 911 (E911) call centers	No	No	No	No	No	No
DOMAIN 4: HEALTHCARE DELIVERY INDEX VALUE (0-10)	4.2	4.3	4.2	4.0	4.1	4.3
SUBDOMAIN 4.1: PREHOSPITAL CARE INDEX VALUE (0-10)	3.4	3.4	3.6	3.2	3.4	4.0
M140 – Number of emergency medical technicians (EMTs) and paramedics per 100,000 population in the state (Min=32.8, Max=224.79)	69.8	66.2	71.6	58.3	53.0	66.6
M331 – Percent of local emergency medical services (EMS) agencies that submit National EMS Information System compliant data to the	41.8%	41.8%	41.8%	41.8%	41.8%	61.0%
state (Min=0.0%, Max=100.0%)						
M349 - State has adopted EMS Personnel Licensure Interstate CompAct (REPLICA) legislation	No	No	No	No	No	No
M350U - The average length of time in minutes between EMS notification and arrival at a fatal motor vehicle crash (MVC) in urban areas	3.7	3.7	3.7	6.6	5.0	5.0
(reverse coded)(Min=1.0, Max=12.1)	;	3.7	3.,	0.0	5	3.0
M350R - The average length of time in minutes between EMS notification and arrival at a fatal motor vehicle crash (MVC) in rural areas	14.1	14.1	14.1	14.3	12.3	12.3
(reverse coded)(Min=5.0, Max=30.0)	11.1	11.1	11,1	11.5	12.0	12.3

SUBDOMAIN 4.2: HOSPITAL AND PHYSICIAN SERVICES INDEX VALUE (0-10)	4.3	4.5	4.3	4.1	5.3	4.9
M147 – Median time in minutes from hospital emergency department (ED) arrival to ED departure for patients admitted to hospitals in the state (reverse coded)(Min=172.0, Max=496.0)	219.0	216.0	222.0	229.0	221.0	211.0
M148 – Median time in minutes from hospital admission decision to emergency department (ED) departure for patients admitted to hospitals in the state (reverse coded)(Min=39.0, Max=264.0)	69.0	71.0	76.0	82.0	73.0	70.0
M152 – Percent of the state's population who live within 50 miles of a trauma center, including out-of-state centers (Min=1.0%, Max=100.0%)	93.4%	93.8%	94.3%	93.2%	93.5%	85.8%
M160 – Number of physicians and surgeons per 100,000 population in the state (Min=125.9, Max=604.9)	197.7	274.6	243.3	231.9	416.0	261.1
M167 – Number of active registered nurse (RN) and licensed practical nurse (LPN) licenses per 100,000 population in the state (Min=0, Max=4253.76)	2178.1	2250.9	1965.7	1913.2	1840.7	1949.6
M168 – Percent of the state's population living within 100 miles of a burn center, including out-of-state centers (Min=0.0%, Max=100.0%)	1.7%	1.7%	1.7%	1.7%	1.7%	1.7%
M296 – Percent of hospitals in the state providing geriatric services (Min=17.9%, Max=71.5%)	61.5%	61.5%	61.5%	60.0%	60.0%	56.6%
M297 – Percent of hospitals in the state providing palliative care programs (Min=10.3%, Max=57.4%)	26.2%	29.2%	30.8%	27.7%	33.8%	43.4%
M298 – Number of hospital airborne infection isolation room beds per 100,000 population in the state, including beds within 50 miles from neighboring states (Min=5.6, Max=244.5)	15.9	15.8	17.6	18.3	19.1	18.2
M299 – Risk-adjusted 30-day survival rate (percent) among Medicare beneficiaries hospitalized in the state for heart attack, heart failure, or pneumonia (Min=11.9%, Max=15.7%)	12.5%	12.7%	13.2%	13.2%	15.2%	14.9%
M300 – Percent of hospitals in the state with a top quality ranking (Grade A) on the Hospital Safety Score (Min=0.0%, Max=83.3%)	30.0%	33.3%	11.1%	11.1%	37.5%	37.5%
SUBDOMAIN 4.3: LONG-TERM CARE INDEX VALUE (0-10)	3.9	3.6	3.0	3.6	2.7	4.1
M308 – Average number of nurse (RN) staffing hours in nursing homes in the state—hours per resident per day (Min=0.5, Max=2.1)	1.1	1.1	1.0	1.0	1.0	0.8
M309 – Average number of nursing assistant (CNA) staffing hours in nursing homes in the state—hours per resident per day (Min=2.1, Max=4.3)	2.6	2.6	2.5	2.5	2.5	2.4
M307 – Percent of long-stay nursing home residents in the state given the seasonal influenza vaccine (Min=86.2%, Max=98.3%)	1.0%	0.9%	0.9%	1.0%	1.0%	94.4%
M310 – Average number of licensed practical nurse (LPN) staffing hours in nursing homes in the state—hours per resident per day (Min=0.3, Max=1.2)	0.5	0.5	0.5	0.5	0.5	0.5
M303B - Number of nursing home deficiencies (evacuation plan deficiencies or emergency planning deficiencies) per 100 nursing homes in the state (1=Highest Quintile and 5=Lowest Quintile)(Min=1.0, Max=5.0)	3.0	3.0	4.0	3.0	4.0	5.0
M23NH - Number of disease outbreaks in nursing homes or assisted living facilities per 1,000 certified nursing home residents in a state (reverse coded)(Min=0.0, Max=16.6)	2.1	4.7	4.6	4.5	7.4	5.3

M276 – Percent of 16 tests for different organisms or toxins that the state public health laboratory provides or assures to assist with	75.0%	75.0%	75.0%	75.0%	75.0%	75.0%
foodborne disease outbreak investigations, including but not limited to listeria and salmonella (Min=40.0%, Max=99.1%)	73.070	73.070	75.070	75.070	73.070	75.070

Montana Measure Details 2013-2018*

Above National Average	Meets National Average	Below National Average
------------------------	------------------------	------------------------

	2013	2014	2015	2016	2017	2018
M195 – Percent of population in the state whose community water systems meet all applicable health-based standards (Min=15.4%,	2013	2014	2013	2010	2017	2010
Max=98.3%)	12.0%	8.0%	11.2%	12.8%	5.0%	3.1%
M925 – Percent of population in the state whose community water systems meet all applicable non health-based standards (Min=19.2%,						
Max=85.0%)	52.2%	38.1%	44.1%	37.0%	28.9%	38.2%
M23PC - Number of foodborne illness outbreaks reported to CDC by state and local public health departments for which a causative	2.0	4.0	2.0	2.0	1.0	1.0
infectious agent is confirmed (per 1 million population)(reverse coded)(Min=0.0, Max=14.9)	2.0	4.9	3.9	2.9	1.0	1.0
SUBDOMAIN 6.2: ENVIRONMENTAL MONITORING INDEX VALUE (0-10)	3.9	3.3	3.9	3.6	3.2	3.2
M202 – State public health laboratory provides or assures testing for air samples	No	No	No	No	No	No
M257_AIHA – State public health laboratory is certified or accredited by the American Industrial Hygiene Association (AIHA)	No	No	No	No	No	No
M257_EPA – State public health laboratory is certified or accredited by the Environmental Protection Agency (EPA)	Yes	Yes	Yes	Yes	Yes	Yes
M257_NELAC – State public health laboratory is certified or accredited by the National Environmental Laboratory Accreditation Conference	Nia	Nie	Nie	Nie	Nie	Na
(NELAC)	No	No	No	No	No	No
M272 – Percent of 12 tests for different contaminants in environmental samples that the state public health laboratory provides or assures,	00.00/	00.00/	00.00/	60.00/	CO 00/	60.00/
including but not limited to asbestos, lead, and radon (Min=0.0%, Max=100.0%)	80.0%	80.0%	80.0%	60.0%	60.0%	60.0%
M273 – State public health laboratory provides or assures testing for hazardous waste	No	No	No	No	No	No
M904 – Number of environmental scientists and specialists per 100,000 population in the state (Min=6.6, Max=237.6)	39.9	43.5	39.2	38.9	37.5	40.0
M23A - Number of disease outbreaks in a state due to animal contact per 1 million population (reverse coded)(Min=0.0, Max=5.2)	0.0	2.0	0.0	0.0	1.0	1.0
SUBDOMAIN 6.3: PHYSICAL ENVIRONMENT AND INFRASTRUCTURE INDEX VALUE (0-10)	3.5	3.5	3.5	3.5	3.6	5.5
M922 - Transportation Structural Integrity, percent of bridges that are in good or fair condition (not poor) (Min=2.0%, Max=100.0%)	5.1%	4.9%	5.4%	5.8%	7.0%	8.1%
M923 - Surface Water Control Structural Integrity, percent of High-Hazard Potential Dams that are not in poor or unsatisfactory condition	75 40/	75.40/	75.40/	75.40/	75.40/	67.40/
(Min=2.0%, Max=100.0%)	75.4%	75.4%	75.4%	75.4%	75.4%	67.4%
M928 - Housing Mitigation for Flood Hazards, population living in a community participating in the FEMA Community Rating System						
(communities with a CRS of 1 through 9) as a percent of all communities participating in the National Flood Insurance Program (Min=0.0%,	61.6%	61.6%	61.6%	61.6%	61.6%	61.8%
Max=100.0%)						
M929 - Flood Insurance Coverage, FEMA National Flood Insurance Policies (NFIP) in-force as a percentage of total housing units located in	22.00/	22.40/	40.00/	40.00/	40.40/	40.60/
100- and 500-year floodplains (Min=1.8%, Max=100.0%)	22.0%	23.1%	19.8%	18.9%	18.4%	19.6%
M334 – State has a climate change adaptation plan	No	No	No	No	No	Yes
SUBDOMAIN 6.4: WORKFORCE RESILIENCY INDEX VALUE (0-10)	4.6	4.7	5.5	5.1	5.6	5.1
M530 – Percent of employed population in the state with some type of paid time off (PTO) benefit (Min=40.8%, Max=70.8%)	57.0%	60.3%	59.8%	57.0%	58.8%	55.4%
M531 – Percent of employed population in the state engaging in some work from home by telecommuting (Min=3.7%, Max=38.0%)	9.1%	6.9%	12.1%	18.7%	18.7%	17.7%
M705 – Percent of employed population in the state who work from home (Min=1.9%, Max=7.9%)	6.5%	6.0%	7.1%	6.0%	6.4%	6.5%

^{*} For an overview of the Index, methodology, and measure details, go to https://goo.gl/gSPq8m

Min and Max values represent minimum and maximum values for all states in all years.

About the Index

The National Health Security Preparedness Index is a program of the Robert Wood Johnson Foundation. The Program Office for the Index is based at the University of Kentucky and staffed through a collaboration between the Center for Public Health Systems and Services Research, College of Public Health, and the Center for Business and Economic Research, Gatton College of Business and Economics. The Program Office is directed by Glen P. Mays, PhD, Professor of Health Systems and Services Research at the University of Kentucky.
